

Vexve XTM Press & Go!

The market's first complete series of shut-off and balancing valves with integrated press fit connections

Complete product family

Vexve X series valves with integrated press fit connections are designed for optimal shut-off and balancing functionality for heating and cooling networks in buildings.

Vexve X is the market's first complete series of shut-off and balancing valves made of steel and stainless steel with integrated press fit connections.

	Vexve product code	mm	DN	PN
Shut-off, steel	108015X	18	15	16
	108020X	22	20	16
	108025X	28	25	16
	108032X	35	32	16
	108040X	42	40	16
	108050X	54	50	16

Balancing, steel	148015X	18	15	16
	148020X	22	20	16
	148025X	28	25	16
	148032X	35	32	16
	148040X	42	40	16
	148050X	54	50	16

	Vexve product code	mm	DN	PN
Shut-off, stainless steel	238015X	18	15	16
	238020X	22	20	16
	238025X	28	25	16
	238032X	35	32	16

Vexve X™ – Fast, reliable and overall cost-effective

Precision control knob with lockable setting makes it easier to adjust the valve and allows temporary use for shut-off without the need for re-measurement

Self-sealing measuring blocks for quick and easy measurement

Integrated press fit connections reduce the number of parts needed, speed-up work steps and reduce leakage risk

Optimized handle and stem structure enables modern insulation standards and cuts off the conduction of cold or heat from the valve body to outside the insulation

Suitable for M and V profile jaws

LBP (leak before press)
O-rings, insertion depth limiter and press collar guarantee successful press fit connection
